Greetings,

I am writing to express my objection to plans for depositing nuclear waste on the sacred site called Yucca Mountain. This plan would put millions of people at risk should an accident occur. Yucca Mountain is the third most seismically active area in the continental US, excluding California and Alaska. In the past 20 years, there have been over 600 earthquakes within 50 miles of Yucca Mountain. I believe a better choice could be made.

Sincerely,
Johanna Porter
